

# Project 3 UI Matched Version

Same layout language as Project 1 and Project 2  
Premium navy/orange dashboard design  
Responsive website with working JavaScript  
Prepared by Tanya Chauhan

# Content Writing Objective

Write SEO-friendly content for digital platforms  
Use keywords naturally, not mechanically  
Optimize H1, H2, H3, metadata, URL, alt text  
Improve readability and conversion intent

## ON-PAGE CONTENT OPTIMIZATION CHECKLIST

### One clear H1

Use the main keyword once in the main heading.

### Logical H2/H3 hierarchy

Break content into scannable sections.

### Keyword density 1-2%

Use keywords naturally; avoid stuffing.

### Meta title & description

Write search-friendly snippets that earn clicks.

### URL slug & alt text

Use readable slugs and descriptive image alt text.

### Internal links & CTA

Guide users to next action and related content.

# IPO Content Model

Input: keyword, user intent, audience problem

Process: structure, keyword placement, readability

Output: optimized content asset ready to publish

## IPO CONTENT MODEL

Input -> Process -> Output for content optimization
